EXPERIENCE

Victoria University of Wellington, Wellington — Research Assistant

March 2025 - July 2025

Assisted a PhD student by supporting research on automated coloring using Stable Diffusion through regular check-ins, collecting colorized data from various models, and developing a Gradio-based interface for model demonstration.

Victoria University of Wellington, Wellington — COMP 261 Tutor

Feb 2025 - June 2025

Tutored COMP261 at Victoria University of Wellington by attending in-person marking sessions, invigilating and marking the mid-trimester test, and participating in staff meetings, while maintaining active communication with students and staff via Discord.

Victoria University of Wellington, Wellington — Content Creator

May 2024 - December 2024

Created content for Victoria University of Wellington by filming and editing a "day in my life" video, which was featured on the university's official TikTok page to promote student life.

EDUCATION

Victoria University of Wellington, Wellington — Bachelor of Science (Hons)

Feb 2026 - Nov 2026

Majoring in Artificial Intelligence.

EXTRA-CURRICULARS

Maths Tutor, Wellington Girls' College

Feb 2022 – Oct 2023

Volunteered twice weekly to support international students with math, focusing on overcoming language barriers.

Wellington Plus Program, Victoria University of Wellington

March 2022 - present

Actively participated in a range of community engagement and volunteering initiatives, including Forest & Bird conservation events, CubaDupa festival support, and university O-Week activities.

Photographer, Wellington International Student Association (WISA)

2022

Served as a volunteer photographer for WISA events aimed at helping international students integrate into the local community. Captured photos to highlight student engagement and promote inclusivity.

SOFT SKILLS

Victoria University of Wellington, Wellington — *Bachelor of Science*

Feb 2023 - Nov 2025

Majoring in Artificial Intelligence and Computer Science. Degree fulfilled on 1st December 2025.

Wellington Girls' College, Wellington — *Year 12 & 13*

Sep 2021 - Nov 2022

Transferred at the end of Term 2 in Year 12. Achieved Excellence Endorsement in Year 13. Awarded NCEA Scholarships in Calculus and Statistics.

The High School Affiliated to Beijing Normal University, Beijing — *Year 11*

Sep 2020 - July 2021

Selected into the Qian Xuesen Honors Class, a program for academically outstanding students with a focus on STEM excellence.

AWARDS

Summer Research Scholarship Program,

Nov, 2025 - Feb, 2026

Worked for 10 weeks on different selection methods (lexicase, tournament and pareto-tournament selection) for genetic programming on various dataset under supervision.

NCEA Calculus scholarship,

Feb, 2023

Earned a New Zealand Scholarship in Calculus (top 3.01% of candidates nationwide)

NCEA Statistics scholarship,

Feb, 2023

Achieved New Zealand Scholarship in Statistics (top 3.05% nationwide)

Miriam Riley Memorial Award for Mathematics,

2022

Awarded a \$500 scholarship

NuLake Cup for First in Mathematics with Statistics,

2022

Awarded the NuLake Cup for placing first in Mathematics with Statistics at Wellington Girls' College

Strong communication

Tutored students from elementary to university level in CS, AI, Engineering, Maths, and Mandarin, adapting teaching methods to diverse academic levels and backgrounds, resulting in positive feedback and improved engagement.

Adaptability

Adapted to school systems across China, the U.S., and New Zealand, developing strong cross-cultural communication and resilience through navigating language, cultural, and curriculum differences.

Teamwork

Collaborated with a group to design a public transportation system for a User Experience Engineering course, by actively participating in team meetings, listening to diverse perspectives, and coordinating tasks among members, which led to a cohesive design and successful project delivery.

LANGUAGES

Mandarin – Native speaker

English – Second language with IELTS score of 8.0

Reference

Available upon request via email.

SKILLS

Java: Learned core concepts and algorithms; applied in graph traversal, parsing, and file compression.

Python: Built GUI apps and applied ML techniques (KNN, Decision Trees, Autoencoders, DNNs, CNNs).

C++: Used in computer graphics for image processing, PatchMatch, camera modeling, and feature matching (SIFT, BFMatcher).

PostgreSQL & R: Used ER/EER modeling, schema design, and SQL querying alongside data cleaning, transformation, and visualization for databases.
